

# **Threshold 14-4-10**

## **Information**

Threshold 14-4-10 is an excellent source of nitrogen, phosphate and potassium. It is derived from a combination of organic nitrogen, potassium carbonate and urea. The organic nitrogen is slowly released to the plant and therefore is available to the plant over a longer period of time. This product is ideal for turf and golf courses that require high nitrogen. This mixture is retained in the root zone longer and provides for an even uptake of these essential nutrients.

## **Directions For Use**

Always apply with adequate water to ensure good coverage at a rate of 4 to 8 ounces per 1,000 sq. ft. Repeat as needed to maintain desired color and health. For best results apply in early morning or late afternoon when leaf pores are open. Any residue in this container is water soluble. Rinse with water and add to tank.
