

Threshold 28-0-0

Information

Threshold 28-0-0 is derived from a combination of organic nitrogen and urea which has less burn potential than urea alone. The organic nitrogen is slowly released to the plant and therefore is available to the plant over a longer period of time. This product is ideal for turf and golf courses that require high nitrogen.

Directions For Use

Always apply with adequate water to ensure good coverage at a rate of 4 to 8 ounces per 1,000 sq. ft. Repeat as needed to maintain desired color and health. For best results apply in early morning or late afternoon when leaf pores are open. Any residue in this container is water soluble. Rinse with water and add to tank.

Guaranteed Analysis
