

Threshold 6-0-1 Cation PLUS

Information

Threshold Cation Plus is a unique, highly effective plant food formulation designed to prevent and correct a wide range of nutrient deficiencies. When used as directed, Threshold Cation Plus will aid the professional turf manager in producing superior turf color and turf health.

Directions For Use

Turf Grass: Apply 2 to 6 ounces per 1,000 square feet as a drench or foliar application. Repeat as needed to maintain desired color and health. Use with adequate water to ensure good coverage. Threshold Cation Plus has a pH of 2 and will therefore buffer your spray water when added to spray tank first. Threshold Cation Plus is compatible with most crop protection chemicals, micronutrients and growth regulators, but for unfamiliar combinations use a jar compatibility test with correct equivalent rates of all products to be used.
