

Threshold 6-0-20 TM

Information

Threshold 6-0-20 is an excellent source for nitrogen and potassium. The nitrogen is derived from a combination of organic nitrogen and urea, which has less burn potential than urea alone. The organic nitrogen is slowly released, and therefore is available to the plant over a longer period of time.

Directions For Use

One gallon of Threshold 6-0-20 contains 0.6 pounds of nitrogen and 2.2 pounds of K₂O.

Greens & Tees: Apply 3 quarts in 3 to 5 gallons of water per 1000 sq. ft. or 32 gallons in 100 gallons of water per acre. Repeat monthly if deficiency is a problem.

Turf & Fairways: Apply 10 gallons of Threshold 6-0-20 in 100 gallons of water per acre.

Compatibility and Container Disposal

Determine compatibility with other fertilizers by use of a jar-test before mixing and application. Do not use when temperatures exceed 90°F or when plants are under stress conditions. Triple rinse empty containers and offer for recycling or dispose of in accordance with federal, state and local authorities.
